HOMES OF THE FUTURE

• Version: « L' habitat du futur » • Collection: « *Dream the Future* »

[DVDA284-S01-06] 1 x 52 minutes | 2016 | \$DVD A: 235/ — \$DVD B: 90/

Cat: Building Construction

To inhabit is to have a place of one's own that both resembles and protects us. The home, in and of itself, symbolizes a multitude of universal values : comfort, security, happiness, intimacy and freedom. But we now face a new dilemma : every week, one million people around the world move into cities. This episode will show how innovations in construction are burgeoning : 3D printing and material salvaging... A special guest appearance by Philippe Starck, creator, designer & architect.

SCHOOL OF THE FUTURE

• Version: « L' école du futur » • Collection: « *Dream the Future* »

[DVDA284-S01-04] 1 x 52 minutes | 2016 | \$DVD A: 235/ — \$DVD B: 90/

Cat: Education

We all dream of having the best school possible for our children – one that nourishes their curiosity, makes them eager to learn, and provides them with the technological, intellectual and human tools that better prepare them for the future in store. This episode will demonstrate how the digital revolution is shaking up education models : collaborative and peer learning, the dematerialization of knowledge, school architecture adapted to types of learning... Featuring a Tibetan Buddhist monk.

ENERGY OF THE FUTURE

• Version: «L' énergie du futur » • Collection: « *Dream the Future* »

[DVDA284-S01-05] 1 x 52 minutes | 2016 | \$DVD A: 235/ — \$DVD B: 90/

Cat: Energy and Natural Resources

In 2050, the energy mix will be a real alternative to oil : thermal, windmill, solar and tidal energies will have attained highly effective production levels. New distribution networks, in which the consumer will take on a new role, will de-compartmentalize centralized systems. Special guest appearance by Bertrand Piccard, the pilot who made history when he completed the first 120-hour flight over the Pacific Ocean aboard the Solar Impulse, an airplane powered solely by solar energy.

FASHION OF THE FUTURE

• Version: «La mode du futur » • Collection: « *Dream the Future* »

[DVDA284-S01-08] 1 x 52 minutes | 2016 | \$DVD A: 235/ — \$DVD B: 90/

Cat: Fashion and Costume

Unless they opt for life in a nudist colony, the 9 billion people on planet Earth in 2050 will still need clothes. From haute couture to ready-to-wear, the fashion industry will have to deal with multiple problems between now and 2050 : overproduction, poor working conditions in the textile chain, the use of chemical products... This episode will reveal how new technologies will transform fashion in 2050: 3D textile printing, intelligent clothes, new fibers, new sustainable materials that adapt to the body's needs...

FOOD OF THE FUTURE

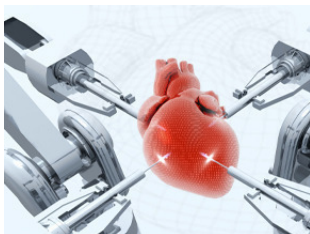

• Version: «L' alimentation du futur » • Collection: « *Dream the Future* »

[DVDA284-S01-03] 1 x 52 minutes | 2016 | \$DVD A: 235/ — \$DVD B: 90/

Cat: Food

Nutritional inequalities, pollution caused by intensive farming, new illnesses provoked by industrial food – the food domain is at no loss for challenges in the future. How will we feed 9 billion people in 2050? Will we go from being simple consumers to real actors in terms of food?... This episode will reveal the ways in which our eating habits will be revolutionized : vegetable proteins, urban farming, connected supermarkets, personalized food, new flavor experiences and more. Featuring a special guest appearance by Alain Ducasse, a 3-star chef in the Michelin guide.

MEDICINE OF THE FUTURE

• Version: «La médecine du futur » • Collection: « *Dream the Future* »

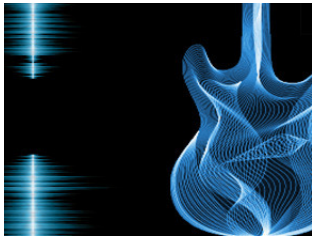

[DVDA284-S01-07] 1 x 52 minutes | 2016 | \$DVD A: 235/ — \$DVD B: 90/

Cat: Medicine

We all want to live as long as possible and in good health. But if there will be over 2 billion people over the age of 60 in 2050, medicine will have to overcome a myriad of challenges (cancer, obesity, cardiovascular diseases) in order to help us live better quality lives... This episode will reveal how medicine in 2050 will be perfectly targeted and adapted to the individual as well as accessible to everyone. Just as science fiction already imagined, medicine in 2050 will be reparative and regenerative.

MUSIC OF THE FUTURE

• Version: «La musique du futur» • Collection: «*Dream the Future*»
[DVDA284-S01-09] 1 x 52 minutes | 2016 | \$DVD A: 235/ — \$DVD B: 90/
Cat: Music

In public transport, at home, while exercising or even at the beach, music accompanies us everywhere. It is an integral part of our lives. The powerful entrance of new technologies into the world of music has shaken up the industry and revolutionized our consumer habits. Now digitized, music can be shared with a simple click... This episode will reveal how new technologies will transform music by 2050: new robotic and intelligent instruments, intuitive composition software, virtual artists, collaborative composition and more...

SEX OF THE FUTURE

• Version: «Le sexe du futur» • Collection: «*Dream the Future*»
[DVDA284-S01-10] 1 x 52 minutes | 2016 | \$DVD A: 235/ — \$DVD B: 90/
Cat: Sexuality

Sex is no longer a taboo subject. At the beginning of the 21st century, an active sex life is even an indicator of success. Watching pornography, using accessories, indulging in masturbation or even having multiple partners - all of these practices have become common & uninhibited. What will pleasure be like in 2050?... This episode will reveal how new technologies will put an end to all sexual taboos, bring couples closer together, and bring a better awareness of our bodies, our pleasure, and our sexual desires.

SPORTS OF THE FUTURE

• Version: «Le sport du futur» • Collection: «*Dream the Future*»
[DVDA284-S01-01] 1 x 52 minutes | 2016 | \$DVD A: 235/ — \$DVD B: 90/
Cat: Sports

As we embark upon the 21st century, sports now occupy a central role in our lives. They set the pace of our daily routines, influence our lifestyles and maintain our health and general well-being. Today, technology seems to have conquered every playing field at a time when individual performance and personal records appear to be reaching their limits. This episode will show how, in terms of technology, the athletes of 2050 will be spoiled for choice : Big Data, exoskeletons, new playing fields, new adversaries, new disciplines.

TRANSPORTATION OF THE FUTURE

• Version: «Les transports du futur» • Collection: «*Dream the Future*»
[DVDA284-S01-02] 1 x 52 minutes | 2016 | \$DVD A: 235/ — \$DVD B: 90/
Cat: Transport

Whether working, transporting merchandise, or even going on vacation, we are in constant movement. But at the dawn of the 21st century, our over polluting and energy-greedy modes of transport have reached their limits : CO 2 emissions are skyrocketing. Climate change is a reality and the situation is now critical. This episode will reveal a future in the making that is as astonishing as it is unexpected : new urban models, eco-mobility, self-driving cars, electric airplanes, revolutionary boats, and more.
