AGRICULTURE AND FOOD

2050: A WORD WITHOUT MEAT

• Version: « 2050: Faudra-t-il vraiment se passer de viande »

[DVDA296-022] 1 x 52 minutes | 2021 | \$DVD A: 235/ — \$DVD B: 90/

Cat: *Agri-Environment, Animal Culture, Food, Plant Culture, Pollution*

Earth hosts 8 billion human beings. 8 billion mouths to feed! But despite massive global agricultural production, despite the scientific progress, about 700 million human beings are starving. How can we find a solution to feed the 10 billion people who will populate the planet in 2050?

CHARLES BURNETT AND THE L.A. REBELLION

• Version: « Charles Burnett and the L.A. Rebellion (VF) »

[DVDA196-026] 1 x 52 minutes | 2019 | \$DVD A: 235/ — \$DVD B: 90/

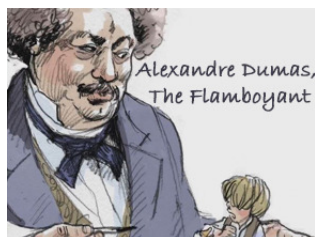

Cat: *Cinema and Film Arts, Social Issues*

Charles Burnett is an eminent figure of the « Black Independent Movement » during the sixties. His dual identity, as Afro-American and independent filmmaker, makes his work rare and valuable, revealing the shortcomings of American society, unequal and divided. A subtle and powerful storyteller, he describes the lives and dreams of Afro-American families, mixing culture and politics in his own unique way...

ALEXANDRE DUMAS, THE FLAMBOYANT

• Version: « Alexandre Dumas, le flamboyant »

[DVDA269-011 A] 1 x 52 minutes | 2020 | \$DVD A: 235/ — \$DVD B: 90/

Cat: *Biography, French Literature*

Alexandre Dumas is one of the most prolific authors of the 19th century. With a great sense of romance and action, he was at the centre of a writing workshop producing true sagas at an almost frenetic rhythm. Reinventing French history, he was a real show-runner, instilling energy in his characters and situations, often inspired by his own life. Between fiction and reality, this documentary recounts the life of a Renaissance Epicurean lost in the 19th century, an author who made generations of readers dream of his Musketeers who are now part of the common heritage of humanity.

BILL GRAHAM, THE ONE AND ONLY

• Version: « Billy Graham, le pasteur de l'Amérique »

[DVDA269-012] 1 x 52 minutes | 2020 | \$DVD A: 235/ — \$DVD B: 90/

Cat: *Biography, Religion, United States*

.5

Billy Graham: a name, a figure, a charisma. As a "super-star" pastor, a gatherer of thousands of faithful, a pro in communication through his "televangelizations", he aroused curiosity, questioning, and sometimes controversy. *Billy Graham, The One and Only* focuses on the «geopolitics of religion»: why are the interactions between religion and politics so strong in America? What links unite Protestantism and capitalism? Why in a Western context of separation of powers and secularization do these links persist.

HUMANS AT WORK

• Version: « Vive le travail »

[DVDA196-030] 1 x 90 minutes | 2020 | \$DVD A: 235/ — \$DVD B: 90/

Cat: Careers and Professions, Industry and Commerce, Workers and Unions

Through 12 international profiles selected according to their activity and embodying current issues, *Humans at Work* examines the professional world today and explores questions related to the changing nature of work and its consequences in the future. In a society that is going through an economic, social and climatic crisis, certain sectors of activity are destined to undergo major changes. In this context, does the precariat (contraction of precariousness and proletariat) embody the emergence of a new social class? Are the unskilled workers likely to disappear? What reality will the working immigrant population face?...

AIR

• Version: « Air » • **COLLECTION: « MASTERS OF THE ELEMENTS »**

[DVDA296-S07-01] 1 x 52 minutes | 2018 | \$DVD A: 235/ — \$DVD B: 90/

Cat: Natural Science, Energy and Natural Resources

The element air exists in many forms, some of them still totally unexploited by man. Beyond the so-called laminar currents, ie. the regular winds close to the ground that conventional wind turbines capture, air can swirl or change temperature with its hot and cold currents. It can also be jerky and more powerful at sea, very fast at altitude and start to oscillate and change direction periodically in the stratosphere. Apart from its variation in power or rhythm, it can also present strange natural phenomena such as the magnus effect which by the rotation of an object can maintain its lift in the air. In this episode, we will meet the "air masters" who have taken up the challenge of exploring air movement on our planet in order to reinvent the way we move, produce electricity and transport goods.

FIRE

• Version: « Feu » • COLLECTION: « MASTERS OF THE ELEMENTS »

[DVDA296-S07-02] 1 x 52 minutes | 2018 | \$DVD A: 235/ — \$DVD B: 90/

Cat: Natural Science, Energy and Natural Resources

.12

Fire produces heat and light. It is naturally associated with the sun. At the heart of the solar core, the temperature is 15 million degrees Celsius. Although the temperature of its radiation on Earth is much lower, its energy potential is colossal and infinite. It warms us and gives us light and without it life would be impossible on Earth. Little valued for decades in favor of fossil fuels, solar energy will be, according to several specialists, the most exploited energy source of the future. But when scientists tackle this ball of fire, they have to deal with two major problems: its intermittence and the power of its heat. Researchers have taken up the challenge and are now working at mastering these two phenomena. Some do not fear the heat of the sun and exploit it to the maximum thanks to concentrated mirrors, others get closer to it by trying to capture the power of the rays in the stratosphere, while others take advantage of the natural phenomenon of photosynthesis.

NUCLEAR POWER - A SOLUTION FOR THE PLANET?

.14

• Version: «Le nucléaire : une solution pour la planète? »

[DVDA269-013] 1 x 52 minutes | 2021 | \$DVD A: 235/ — \$DVD B: 90/

Cat: Energy

The decline of the nuclear power is a planetwide trend. Of the 400 working reactors in the world, half will be shut down within 20 years. Following the Fukushima disaster, in Europe Germany gave up on nuclear energy and will close its last plant in 2022. Belgium, Switzerland and Spain will follow suit by abandoning the atom. France, the most nuclear country in the world with 70% of its electrical energy coming from the atom, made an historic swerve in 2020 by retiring Fessenheim, the oldest of its nuclear plants, and 12 other reactors of the remaining 56 will be closed by 2035. What if the clean atom were a smoke-screen? It is true that the nuclear production of electricity emits very little CO2, but does that make it ecologically sound?

LEBANON, REVOLUTION OF DESPAIR

• Version: « Liban, la révolution naît des entrailles du chagrin »
[DVDA196-029] 1 x 52 minutes | 2020 | \$DVD A: 235/ — \$DVD B: 90/
Cat: Contemporary History, Conflicts and Resolutions, Africa

.18

Thirty years after the civil war, as the first signs of a major economic crisis emerged and the country was ravaged by corruption scandals, the Lebanese people began the most important revolutionary upsurge in their history. Up to 2 million Lebanese took to the streets to denounce a corrupt, inept, clientelist political class responsible for the deep economic crisis into which the country was sinking. All over the country, the Lebanese were demonstrating without distinction of religion or community. "One, one, one! The Lebanese people are one". For a year, from the very first night of the revolution to the explosion in the port of Beirut, the film follows this unprecedented revolt. From Beirut to Baalbek via Tripoli, the destiny of these revolutionaries though at odds with each other, were united by the revolution...

.28

• Version: « PMA-GPA, les enfants ont la parole »
[DVDA196-027] 1 x 70 minutes | 2020 | \$DVD A: 235/ — \$DVD B: 90/
Cat: Children and Youth, Family, Sexual Diversity, Social Issues

In the past, as moral values have changed, documentaries have recorded the words of children of divorced parents, children of homosexual parents, children brought up in single-parent families... So many different models that, with time, have become "commonplace" and no longer raise questions...Who are these "new" children, these "pioneer" children? What is their vision of their atypical situation? How do they talk about this "particularity" with those around them? With their parents? Their friends? With the "outside world" in general? What do they know of how they were conceived? What were they told? How were they told? What questions remain unanswered? How do they see their future? At a time when a new style of parenting is trying to find its place in our society, this film aims to be a forum for those most concerned: those children who, today, are writing the first pages of this new account.
